

OUR MISSION

The Resilient Infrastructure + Secure Energy [RISE] Consortium™ seeks to address the energy security and climate crises by reimagining how we use, generate, transport, and store energy and how we build efficient, modern, resilient infrastructure.

OUR CHALLENGE

The federal government is the world's largest user of energy, and its critical missions are vulnerable to extreme weather, cybersecurity attacks, and energy supply chain disruptions. In order to address these urgent challenges, we must rapidly develop and scale new paths for innovation and collaboration.

OUR MEMBERS

RISE Consortium members include manufacturers, technology startups, energy services companies, utilities, academic institutions, financiers, and legal, consulting, and engineering firms.

BENEFITS OF JOINING THE CONSORTIUM

Apply now at www.rise-consortium.org. Membership is free and will include access to key events.

In addition, members may achieve:

FASTER CONTRACTING SPEED AND MORE BUSINESS OPPORTUNITIES

MARKET EXPANSION INTO THE DEPARTMENT OF DEFENSE AND ITS SERVICES

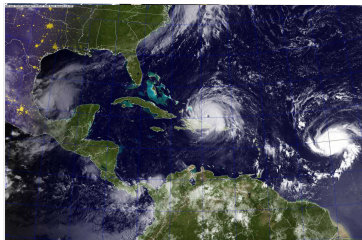

ACCESS TO DoD STAKEHOLDERS & AN INNOVATIVE INDUSTRY NETWORK

CONSORTIUM FOCUS AREAS

INSTALLATION ENERGY RESILIENCE

The energy used by DoD to power more than 500 installations, 300,000 buildings, and 160,000 non-tactical vehicles.

CLIMATE RESILIENCE

The process of identifying and mitigating vulnerabilities to climate-related risks and threats.

OPERATIONAL ENERGY RESILIENCE

The energy required for training, moving, and sustaining military forces and weapons platforms for military operations.
